SUMMARY

Result-oriented Software Developer with over a year of professional experience in enterprise-level application development and digital transformation. Currently a Software Developer at Heitech Padu Berhad, contributing to a high-impact national digital modernization project. Proficient in Java, SQL (DB2), and the full software development lifecycle (SDLC), with a proven ability to translate complex business requirements into scalable technical solutions. Complemented by a background in technical requirement analysis and project coordination, I bring a holistic approach to building efficient, production-ready code. UiTM Shah Alam Alumnus (Bachelor of IT) seeking to transition into a Software Engineer or Full Stack role within a dynamic, growth-focused organization.

WORK EXPERIENCE

Software Developer **Sep 2025 - present**
Heitech Padu Berhad | Cyberjaya, Selangor

- Executed the modernization of legacy infrastructure by migrating critical modules from COBOL to Java using Spring Tool Suite (STS).
- Conducted rigorous API testing and debugging via Postman while validating database integrity through DBeaver to ensure accurate data retrieval.
- Managed source code versioning and project repositories by committing updates to GitLab via Git Bash and Spring Tool Suite (STS).
- Collaborated with cross-functional teams including the Application Development Manager (ADM) and System Analysts to align on technical requirements.
- Contributed to a high-impact national digital modernization project by implementing backend services and managing complex database schemas.

Programmer (Protege) **Apr 2025 - Sep 2025**
Tulip Resources Sdn Bhd | Bangsar, Kuala Lumpur

- Translated business requirements into comprehensive technical documentation and test scripts for the IRIS project.
- Facilitated the conversion of User Acceptance Testing (UAT) results into standardized training manuals and final acceptance documentation.
- Participated in project lifecycle meetings for the HS-WiM system to engage with clients and refine technical requirements.
- Utilized Redmine for defect tracking and end-user testing to ensure applications met all functional requirements prior to deployment.

IT Intern **Sep 2024 - Jan 2025**
Perbadanan Perpustakaan Awam Selangor | Shah Alam, Selangor

- Developed a custom attendance system to streamline operational workflows and demonstrate technical problem-solving.
- Designed and built an iOS application during specialized technical training to expand mobile development expertise.
- Played a key role in maintaining and optimizing digital infrastructure to ensure seamless system performance and user satisfaction.

EDUCATION

Universiti Teknologi MARA (UiTM) | Shah Alam, Selangor **Oct 2021 - Jan 2025**
Bachelor of Information Technology (Hons.) | CGPA 3.34

- Developed an IoT-based Smart Clothes Hanger system for Final Year Project utilizing Java and C++ with Firebase for real-time data synchronization
- Achieved a 78.3% System Usability Scale (SUS) score through rigorous user testing and interface optimization

ACHIEVEMENTS

- Recipient of the Dean’s List Award for 3 consecutive semesters
- Bronze Award in National Innovation & Invention Competition (NIICE2022)

LICENSES & CERTIFICATES

• Introduction to Artificial Intelligence LinkedIn	<i>Feb 2025</i>
• App Development with Swift Associate Selangor Technical Development Center/STDCx	<i>Dec 2024</i>
• Oracle Database Design Oracle Academy	<i>Jan 2023</i>
• Oracle Programming with SQL Oracle Academy	<i>Jan 2023</i>

SKILLS

- **Languages & Frameworks:** Java (Spring Boot), Angular, PHP, Python, C++, Swift (SwiftUI)
- **Modernization & Logic:** Legacy-to-Java Migration, COBOL Logic Analysis
- **Databases:** SQL (DB2, Oracle, MySQL), Firebase (Real-time DB)
- **DevOps & Tools:** Docker, Kubernetes, Git (GitLab), Postman, DBeaver, Arduino IDE
- **Methodologies:** SDLC, UAT, Technical Documentation, Technical Analysis

LANGUAGE

- **Malay** (Native or bilingual proficiency)
- **English** (Professional working proficiency)
